

Prototype 2

Plan for Prototype 3

Neha Nepal, Lucky Babcock-Chi, Flynn Irvine, Paul
Sundstrom

Introduction

What is the problem (include a picture, sketch, or video showing the problem)?(10 points)

User: Who did you observe having a problem?(10 points)

What is your potential solution? Include an overview drawing showing the key functionality of your solution. (10 points)

Prototype 1

Define + Ideate + Calculate: (i) List requirements for the prototype. (ii) Describe its design (include sketch). (iii) Include a calculation that informed the design. (10 points)

Prototype/Test: Document testing with sketches, pics, videos. Ideally include a plot. (20 points)

Learn: Did it meet your requirements? If so, is there anything that could be improved? If not, consider performing a Root Cause Analysis (What is the Problem? Why did it happen? How can you fix it?). Either way, what did you learn from testing this prototype? (10 points)

Prototype 2

Define + Ideate + Calculate: (i) List requirements for the prototype. (ii) Describe its design (include sketch). If this prototype is an iteration of Prototype 1, how did you incorporate your learnings?(iii) Include a calculation that informed the design. (10 points)

Prototype/Test: Document testing with sketches, pics, videos. Ideally include a plot. (20 points)

Learn: Did it meet your requirements? If so, is there anything that could be improved? If not, consider performing a Root Cause Analysis (What is the Problem? Why did it happen? How can you fix it?). Either way, what did you learn from testing this prototype? (10 points)

Prototype 3

Define + Ideate + Calculate: (i) List requirements for the prototype. (ii) Describe its design (include sketch). If this prototype is an iteration of Prototype 1 or 2, how did you incorporate your learnings? (iii) Include a calculation that informed the design. (10 points)

b. For any parts you will need to acquire, list: (10 points)

i. Name of part

ii. Where you will acquire it

iii. Cost

iv. Lead-time

Plan for finishing

- a. List key items to be done before the Week 9 Final Presentation (10 points)
- b. Provide an estimate of which week you will complete each of the above items (5 points)
- c. Provide an estimate of your total budget (5 points)
